

WHAT IS CLAIMED IS:

1. A coating composition comprising:
 - 5 a) urethane (meth)acrylates that contain (meth)acryloyl groups and free isocyanate groups,
 - 10 b) urethane (meth)acrylates that contain (meth)acryloyl groups and free hydroxyl groups,
 - 15 c) a UV initiator that initiates radical polymerization and
2. The coating composition according to Claim 1, wherein the compound that reacts with isocyanate is a polyol.
- 20 3. The coating composition according to Claim 1, wherein the compound that reacts with isocyanate contains ethylenically unsaturated groups.
4. The coating composition according to Claim 1, wherein a further compound that reacts with isocyanate is a sterically hindered, secondary, polybasic amine.
- 25 5. The coating composition according to Claim 1, further comprising a UV absorber having an absorption range of up to 390 nm.
- 30 6. The coating composition according to Claim 1, further comprising a HALS amine.

7. A heat-sensitive article coated with a coating composition according to Claim 1.

5 8. An article having complex three-dimensional shape coated with a coating composition according to Claim 1.
